

POL-PRO-FLH-RGB

Thank you for purchasing XTC Power Products RGB Fang Lights. This Harness is completely plug and play, no wires to cut, no crimping, just Plug into the Polaris Pulse Bar and the new Fang Lights.

1. Mount the Controller near the OEM Pulse Bar
2. Remove one of the blanks from the Pulse Bar and plug the controller power into it
3. Remove Factory Blank or Factory Fang Light
4. Mount the new fang lights. The opening for each fang light must be trimmed out so that the raise in the new light wire can fit, shown below with the arrows.

- Run cables to each Fang Light, left to left/driver and right to right/passenger side, insert plug and hand tighten lock ring.

- Attach the wire from the ATS Turn Signal Kit, green to green and yellow to yellow to activate the turn signals.
- Attach the white wire to an optional switch, this is used to force the fang light into its white mode.
- Pull the plastic tab on the remote out to turn on the remote.

Note: The remote comes preprogrammed to the controller. If it does not operate the light or you have other devices you want to control push and hold the bottom right lock switch for 5 seconds. After it connects and works it can be relocked by holding the lock switch down once again.

Download the phone application on google play store or Apple. Search for PRO RGB and follow app instructions.
