

Dash Turn Indicators

Thank you for purchasing XTC Power Products TSS-IND-LR. This item is from our Plug & Play™ product line, no wires to cut, no crimping, mount the LED's and plug into the ATS or TSS! Once installed the Green Arrow LED's will Flash the direction when Activated from Turn System.

Please read the instructions fully and familiarize yourself with the components before starting the install.

1. **Drill Holes in Dash** - Locate a desirable place to mount the indicators, **VERIFY** there is clearance behind the dash and drill a Left and Right 15/32" Hole.
2. **Mount the LED's** – Un-Plug the LED's from the harness by pushing in on the center tab on the white connector, remove the nut from the led and insert the connector into the drilled hole and reinstall the nut. Make sure the arrow is pointed the correct direction before tightening the nut. Do the same for the other LED.
3. **Connect the Adapter to the ATS or TSS** – Unplug the Front wire harness form the Control Unit and plug the TSS-IND-LR in. Plug the front harness into the adapter.
4. **Run the Wires** – Run the connector with the Green Wire to the Right/Passenger side LED and plug LED into it. Run the connector with the yellow wire to the Left/Driver LED and plug the LED into it.
5. **Secure Harness** – Using the provided cable ties secure the wire harness
6. **Verify Operation**
