

TSS-STR-F or R

Thank you for purchasing XTC Power Products Adapter. Our Easy Install adapters make installation a breeze.

Unplug the Turn Signal Rear Harness from the main unit and plug the new Adapter in line. Run the wires from the adapter to the strobe out. It does not matter Right from Left. In the case below, we swapped the right and left front and rear strobe to get more effect. Or you can wire the Yellow to Yellow and Green to Violet. Do the same for the Front Adapter. Go Play!
